Nursery Located at Newport, Minnesota

J. V. BAILEY, NURSERYMAN

Following is a list of nursery stock, with prices for spring delivery. These quotations are f. o. b. St. Paul, or at nursery, excepting where otherwise stated.

PURE-BRED STRAWBERRY PLANTS

In the Home Garden or On the Farm

Nothing is So Delicious and So Profitable
as Strawberries

To my friends and customers who know my strawberry plants it is unnecessary to say anything, but to those who have not tried my plants, I will say that they are sturdy, well rooted, pure bred, year-old plants. They have been mulched all winter to insure abundant vitality to withstand transplanting. I use commercial fertilizer at considerable expense to produce plants of the very best quality. My thirty years experience as a berry grower has convinced me that plants propagated for transplanting should excel in root vitality.

Barnyard manure, while producing luxuriant tops, does not develop root strength in the young plant equal to that produced by the especially prepared fertilizers.

Each order is dug and packed separately and shipped the same day. I do not dig large quantities of plants and then fill orders from a stock room.

Plants are tied twenty-five in a bundle.

Formerly I have propagated twenty-five or more varieties of strawberry plants but have eliminated many of these and now offer only the best to grow in Minnesota and surrounding states.

All the varieties which I grow are perfect flowered and any one variety will produce fruit when planted alone, which is not the case with pistillate or imperfect flowering varieties.

The crop of Strawberry plants is very light owing to the fact that last season was dry and unfavorable to the development of new plants. My supply is limited. The plants, however, are well rooted and full of vigor. My prices are reasonable, considering the small crop of plants.

Every garden should have a strawberry bed large enough to supply the family with ripe strawberries from the middle of June until October besides enough for canning purposes. Do not fail to get some of my plants this year.

J. V. BAILEY, NURSEYMAN

Everbearing Varieties

The everbearing strawberry is fast taking the place of the June bearing varieties as they produce fruit abundantly the same reason that the plants are set, then produce a good crop of fruit the following spring. They are not subject to the effects of the strawberry weevil, which destroys so many June bearing patches. The two varieties which I offer are very hardy and are the most popular of the everbearing.

PROGRESSIVE—Staminate. Very productive. Fruit medium size and of excellent quality. Produces fruit from about a week earlier than any June variety until late fall. 50c per dozen, \$1.00 for 25, \$1.75 for 50, \$3.00 for 100. Postage paid. \$20 per 1000 F. O. B. St. Paul or at nursery.

SUPERB—Staminate. Fruit very large and attractive. While this is one of the best everbearing varieties, I consider it the best June bearing variety also. I usually grow a heavy crop of this variety in the fall and the following spring the same plants produce an immense crop of excellent fruit. 50c per dozen, \$1.00 for 25, \$1.75 for 50, \$3.00 for 100. Postage paid. \$20.00 per 1000 F. O. B. St. Paul or at nursery.

June Bearing Varieties

PREMIER—Staminate. I am pleased to offer a new strawberry that I can recommend to be an improvement over all other early varieties. This variety was introduced by R. M. Kellogg and has proven to be just what we were looking for in an early fruiting variety. Plants grow large and are wonderfully productive. The berries are large and of a beautiful glossy red color. I have never found so many good qualities in an early berry. I have talked with several growers who have tried out this variety and they are all enthusiastic about it. 25 plants 75c, 50 plants \$1.25, 100 plants \$1.75; \$10.00 per 1000.

MINNEHAHA, formerly known as Minnesota No. 935—Staminate. While this is one of the newer productions it has been tried out enough to be placed among the best varieties. Fruit is very large, season of ripening late. Plants very hardy. I consider this our best late variety. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.50; \$8.00 per 1000.

MINNESOTA, formerly known as Minnesota No. 3—Staminate. This variety has become so well known that it is not necessary to describe it here other than it is a popular early variety resembling the Senator Dunlap in many respects. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.50; \$8.00 per 1000.

GIBSON—Staminate. This is one of my best early varieties. Many of the commercial growers are growing this variety for their main crop. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.50; \$8.00 per 1000.

SENATOR DUNLAP—Staminate. The Senator Dunlap is too well known to require a description. It is still a very popular strawberry. 25 plants 50c, 50 plants \$1.00, 100 plants \$1.50, \$8.00 per 1000.

J. V. BAILEY, NURSEYMAN

ASPARAGUS

PALMETTO—Strong yearling roots. \$2.00 per 100; \$10.00 per 1000.

RHUBARB OR PIE PLANT

MAMMOTH VICTORIA—This variety is larger and of better quality than any of the old varieties. Divided roots, 20c each; \$1.25 per 10. For larger quantities I will quote prices on application.

CURRENTS

The following varieties have all proven excellent in my fruiting field. They are far superior to the old varieties, which I have discarded.

LONG BUNCH HOLLAND, POMONA, WILDER, RED CROSS, DIPLOMA, LONDON MARKET, CHERRY CURRENT, BLACK CHAMPION CURRENT AND WHITE GRAPE CURRENT—30c each; \$3.00 per dozen; \$20.00 per 100.

RED RASPBERRIES

I have discarded everything in raspberries but the two following described varieties as they promise to be the coming varieties for the Minnesota grower.

LATHAM, formerly known as Minnesota No. 4—This berry has become so well known that it is not necessary to describe it here. 10 plants \$1.00; 25 plants \$2.00; 100 plants \$7.00; \$45.00 per 1000.

REDPATH—I introduced this new raspberry for the first time last year. At that time I was satisfied of its superior qualities and, after another year of fruiting, I am convinced it is the best raspberry at the present time. This is the berry you have been looking for. Fruit a bright red, firm and very large, a heavy yielder and perfectly hardy. This variety does not seem susceptible to the diseases common to the red raspberry. If you want the best, do not fail to order some of these plants. 10 plants \$1.50; 25 plants \$3.00; 50 plants \$5.50; 100 plants \$10.00; \$75.00 per 1000.

GOOSEBERRIES

THE CARRIE—This variety has become so well known that I do not need to mention its many good qualities but I will say that it is nearly thornless and is practically disease resisting, and a heavy bearer. 30c each; \$3.00 per dozen.

GRAPES

BETA—This grape has become very popular as it is early, very productive and does not require covering in the winter as it is as hardy as the wild grape of Minnesota.

ALPHA—A hardy grape that does not require winter covering. Considered, by many growers, superior to the Beta.

HUNGARIAN—This is a hardy grape that produces a larger fruit than the Beta but is a slower growing vine and probably not so productive.

CONCORD—This variety is very well known.

WHITE NIAGARA—A large variety of the white grape.

CAMPBELL'S EARLY—A very good grape of the purple sort.

Any of the above varieties, two year old, 50c each, \$4.00 for 10; one year old strong, well rooted plants, 40c each; \$3.00 for 10; \$20.00 per 100.

J. V. BAILEY, NURSERYMAN

APPLE TREES

WEALTHY, DUTCHESS, PATTEN'S GREENING, OKABENA, PEERLESS, HIBERNAL, McINTOSH, MALINDA, SCOTT'S WINTER, YELLOW TRANSPARENT, STRAWBERRY CRAB, VIRGINIA CRAB, WHITNEY CRAB—5 to 7 ft. trees, three years old, \$1.00 each; \$10 per dozen; \$75.00 per 100.

PLUMS

We have felt the want of a better plum for the Northwest and have been watching, with interest, the development of the new varieties originated at the Minnesota State Fruit Breeding farm. These plums are far superior to the older varieties which we have been growing and I feel perfectly safe in recommending them. They are very fast growing and usually come into bearing the second year after setting. I have selected and propagated the following four varieties. These are one year old trees, 3 to 5 feet high.

MONITOR (Minnesota No. 70)—Tree unusually vigorous and produces a compact, well shaped head, very productive and perfectly hardy. Fruit large, roundish, well colored with dark red; quality good. This is a good market plum as well as for home use.

TONKA (Minnesota No. 21)—This is a very hardy plum which yields an abundance of large fruit of excellent quality. The fruit is yellow, well overlaid with red. It ripens about August 15th and is a good market plum as it stands shipping well.

ELLIOT (Minnesota No. 8)—This plum is also a vigorous grower and very productive. It has all the good qualities of the two former described varieties but does not ripen until about September 1st.

UNDERWOOD (Minnesota No. 91)—Produces one of the strongest growing trees. It is entirely hardy and very promising because of its large early fruit. Fruit attractive red, with fairly firm juicy flesh, small pit, clingstone, hangs well, and ripens over a long period. Season, August 1 to 15.

Any of the above named varieties, one year old trees, 3 to 5 feet high, \$1.50 each; \$15.00 per dozen.

DE SOTO—Three-year-old trees, four to five ft., \$1.00 each; \$10.00 per doz.

HOMER CHERRY—\$1.00 each; \$10.00 per dozen.

J. V. BAILEY, NURSERYMAN

FLOWERING SHRUBS

DOUBLE FLOWERING ALMOND—\$1.50 each.

SPIREA VAN HOUTI,—Medium sized plants 50c each.

SYRINGA, SNOWBALL, HONEYSUCKLE (TARTARIAN)—75c each.

HYDRANGEA (PANICULATA)—\$1.00 each.

HEDGE PLANTS

BUCKTHORN, BARBERRY (Thunbergii) 30c each; \$2.50 for 10 plants;
\$20.00 per 100.

HARDY PERENNIAL PLANTS

PEONIES—White, pink and red, divided roots, 30c each.

IRISES—Blue, 20c each; \$1.25 for ten.

PERENNIAL PHLOX—25c each; \$2.00 for 10.

EVERGREENS AND SHADE TREES

COLORADO BLUE SPRUCE—1½ to 3 feet, twice transplanted, \$1.00 to \$2.50 according to size and color. Three to five feet, three times transplanted, \$2.00 to \$7.00, according to color of foliage and individual specimen. I have a fine lot to select from.

NORWAY SPRUCE—Three times transplanted, 3 to 4 feet, \$1.00 each; 4 to 5 feet, \$1.50 each.

BLACK HILL SPRUCE—A very fine lot to select from, 3 to 4 feet, \$1.00 to \$2.00 each, according to specimens.

ARBOR VITAE—12 to 18 inches, 50c each—2 to 3 feet, 75c each.

WHITE ELM—Ten to fifteen feet, \$3.00 to \$5.00 each, according to individual specimens.

WHITE BIRCH—5 to 15 feet, \$1.00 to \$2.00 each.

WHITE BIRCH, (Cutleaf Weeping)—6 to 8 feet, \$3.50 each.

MOUNTAIN ASH—\$1.00 to \$2.00, according to size.

HARD OR SUGAR MAPLE—\$1.00 to \$2.50, according to size.

SOFT MAPLE, NORWAY MAPLE, WHITE ASH—Twelve to twenty feet, \$2.50 each.

Will quote prices on evergreens or shade trees in quantities on application.

HUBBARD SQUASH SEED

Ounce, 25 cents, ¼ pound, 50c; \$1.50 per pound.

MILLER'S CREAM MUSKMELON SEED

Ounce 25 cents; ¼ pound, 50 cents; \$1.50 per pound.

JAPANESE RICE POPCORN SEED—25c per pound.

J. V. BAILEY, NURSERYMAN

MY GUARANTEE AND TERMS

That all nursery stock herein quoted, is grown under modern scientific methods.

That plants are securely and freshly put up in damp packing material.

That all nursery stock is true to name and correctly labeled.

That certificate of inspection accompanies each shipment of nursery stock.

In no case will I be liable for more than the original purchase price.

Prices quoted in this price-list are f. o. b. St. Paul or at nursery.

Deliveries will be made daily to the different express offices in St. Paul and to the St. Paul post office.

Cash with order when stock is to be shipped, or will accept one-fourth of purchase price in advance and ship goods C.O.D. for balance if preferable.

N. J. Holmberg, Commissioner.

Inspection completed Aug. 24th, 1921.

CERTIFICATE OF NURSERY INSPECTION

This is to certify that in accordance with Sec. 1, Chapter 206, Session Laws of 1913, the nursery stock and premises of The Bailey Nursery of Newport, Minn., J. V. Bailey, Proprietor, have been carefully examined by a duly authorized inspector and found apparently free from dangerously injurious insects and contagious plant diseases.

This certificate is good until November 1st, 1922, unless revoked, and covers only stock actually on the premises when examined.

G. W. PEAKE,

Chief Deputy Nursery Inspector.

A. G. RUGGLES,

State Entomologist.
